COMPETÊNCIAS

Flutter

Nuxt

Vue

Node.js

PERFIL

I'm a Senior Lead Developer with solid experience building Android, iOS, and web products, working from planning to delivery with a strong focus on architecture, integrations, and quality. Skilled in Flutter, Nuxt/Vue, REST APIs, SQL databases (PostgreSQL/MySQL), and Supabase backend (Auth, payments, push notifications, Edge Functions). I've delivered solutions for fintechs, clinics, e-commerce, and internal systems.

EXPERIÊNCIA PROFISSIONAL

Lead Developer Sênior, Fraktal Softwares   São Paulo
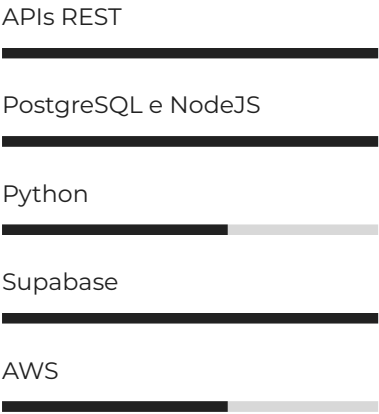

Jul 2024

I lead the development of scalable SaaS products with a strong focus on performance and modular architecture, using Flutter, Nuxt, Python, Node, Supabase (Auth, Realtime, Edge Functions), n8n, and complex integrations via REST/HTTP APIs.

I manage the full software development lifecycle — from concept to deployment — delivering for Android and iOS platforms, ensuring high-performing, secure applications with excellent user experience.
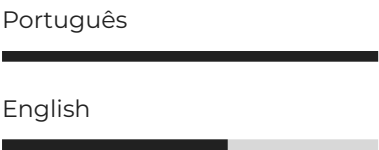

The solutions I've built include products for fintechs, clinics, marketplaces, and internal systems, with heavy use of automation and asynchronous workflows.

Software Engineer, GuaráSoft | Software House   Curitiba

Abr 2024

I worked on the development of APIs for Android applications and internal systems using Flutter, Supabase, PostgreSQL, and Node.js. I was responsible for integrating legacy systems with new platforms through RESTful APIs, as well as improving performance, security, and scalability. I used Git for version control, CI/CD pipelines, and agile methodologies.
